SELF - SERVE
BOTTLING SYSTEM
BY REVERSE OSMOSIS**

100% CANADIAN

Environmentally Friendly

- Our total water filtration system is a chemical free process.
- We filter municipally treated water therefore not affecting local wells and ground water.
- Our customers re-use existing sturdy plastic containers during each visit thus drastically reducing one time use water bottles that often end up in landfills.

Our Service

- Trillium Pure Water Co. offers service second to none in the industry.
- Our specially trained technicians clean, service and sterilize our dispensers on a regularly scheduled basis. Service logs are maintained at every site.
- Water samples are taken regularly and sent to our lab for testing.
- A safe and high quality drinking water will always remain our top priority.

About Us

- Trillium has been operating and doing business in the Ontario market since 1999 with over 60 locations throughout the province to better serve you.
- We pride ourselves of delivering a high quality product at a very reasonable price.
- We have invested greatly in the most advanced technology accompanied by outstanding customer service.
- We are a 100% Canadian company with our dispensers fabricated here in Canada.

How To Clean Your Water Container

- Every Trillium dispenser is equipped with a built in ozone rinse system.
- Our rinse allows customers to sterilize their container before every fill.
- This rinse system eliminates the need for harmful chemicals to take care of this task.

For Your Convenience

- Many of our dispensers are located in neighborhood food stores often open for business 24 hours.
- Easy cleaning of your water bottle and a new industry standard snap-on spill free cap is included at no extra charge with every fill of the 11.5 and 18.9 litre container.
- You can fill various size containers; from 4 to 18.9 litres.

We Help You Save Money

- Your entire family can benefit and save money by using our self serve water dispenser.
- You are in effect buying purified water at a bulk rate with our 18.9 litre fill costing less than 0.16 cents per litre. Trillium water can be compared to other industry leading, commercially bottled waters costing many times more.

New Ideas

- You will taste the difference the first time you take a sip.
- Try using our water when you make your next cup of coffee, tea or juice. It will add noticeable flavour to your favorite dish including soups, broths and sauces.
- Try it with your baby formula.
- Have a glass today. Give the best to you family!

What is Reverse Osmosis Water?

- This scientific method of filtration has existed for decades and has become very refined and sophisticated over the years.
- This process involves forcing pre treated water under pressure, through the very small pores found inside of the specially designed Reverse/Osmosis membrane used. This process will allow our system to remove up to 99% of harmful impurities, heavy metals and toxic chemicals commonly found in drinking water.
- It really works!

How does it work?
